BUILT FOR EVERYDAY TRADE

Basin and Pedestal in a Box simply grab and go.

Toilet in a Box simply grab and go.

Commercial Packs everything you need under one code.

Choosing the right products for any commercial or domestic project doesn't just come down to style or cost.

It comes down to trust.

That's why our washroom and bathroom solutions are designed to be the everyday products installers can rely on.

Whether it's having products designed for specific applications, a dedicated team ready to help you at every stage, spares available whenever they're needed or just a name your customer's familiar with, every fitter and contractor can rely on Armitage Shanks or Ideal Standard to help them get every project right first time.

Whatever your project, wherever you are, we're here at every step – solving problems fast, helping increase profit and making customers happy. We'll work with you to make your job easier, and make sure you have everything you need.

It's as simple as that.

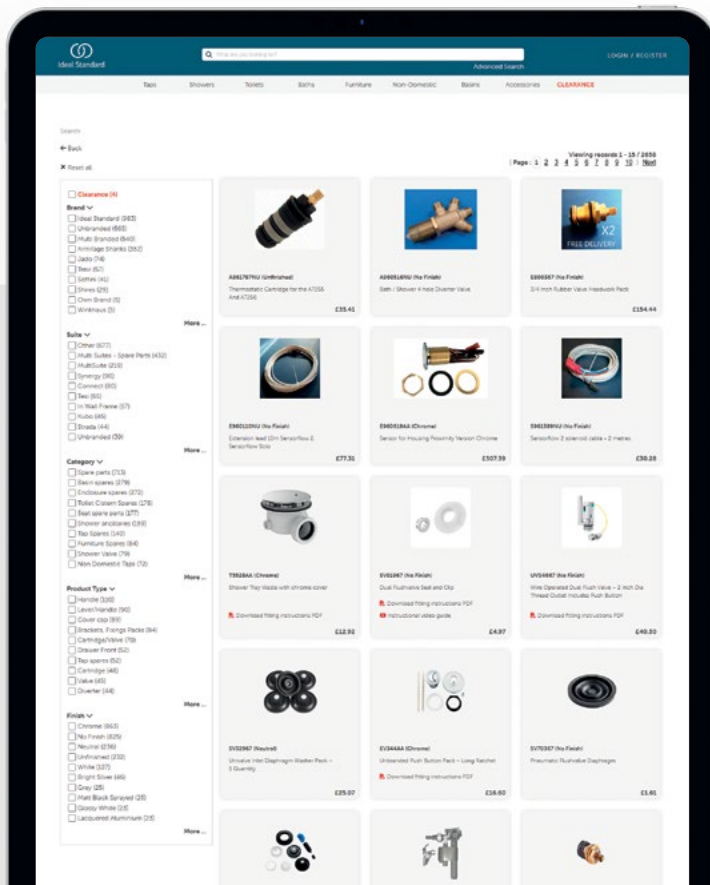

We're here. 

Keep jobs moving with Fastpart Spares.

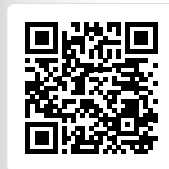

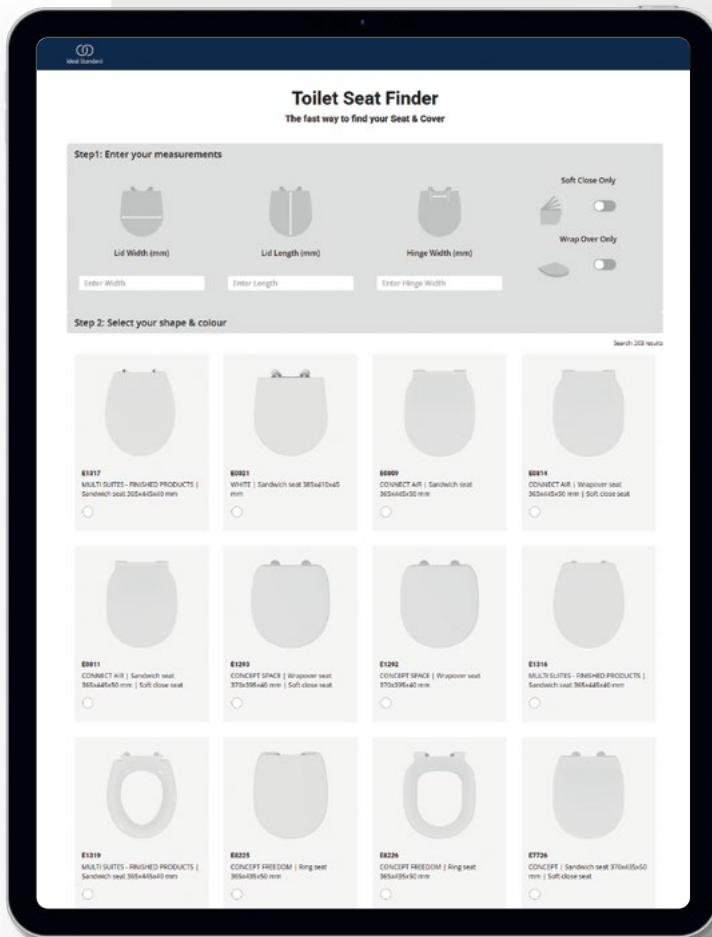

Order the parts you need, whenever you need them with 24/7 access via our Fastpart-spares.co.uk

Not sure what you need?
Our team are on hand by phone or email to support you and help get the right part first time - saving time on site and avoiding delays.

Keep jobs moving with Fastpart Spares.

Discover our performance-driven innovations designed to save natural resources, reduce the embodied carbon of our products, extend their longevity and promote health.

FIRMAFLOW®+

ENGINEERED
TO LAST.

Ideal Standard pioneered the ceramic mixer tap disc cartridge in 1969, revolutionising the way people use bathrooms forever and making it possible to create the single lever tap.

Some 50 years on, the evolution of this innovation, FirmaFlow®+, continues to set the standard for ceramic discs through exceptional engineering and extraordinary durability, offering heat resistance up to 90°C. Our FirmaFlow+ cartridge is engineered to last 750,000 cycles, which is beyond 20 years of daily use for a family of four. 4 persons x 10 uses per day x 365 x 20 years = 292,000 times in 20 years.

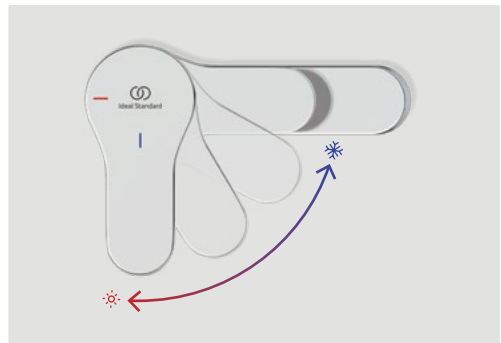

BLUESTART®

TECHNOLOGY.

BlueStart® technology has plastic waterways, which isolate the water from metal surfaces, avoiding lead & nickel leaching in drinking water.

With standard taps most people turn on the water in the mid-lever position, resulting in a mix of hot and cold water. But very often warm water isn't needed at all. Cold water is usually sufficient for washing hands, brushing teeth or cleaning. BlueStart® technology avoids this unnecessary warm water use.

EASYFIX+

ENGINEERED FOR SPEED.

EasyFix+ enables fast installation in as little as half the time when compared with other standard market taps. Available on selected products from our range of basin fittings, this technology offers quick, effortless installation thanks to Ideal Standard's innovative mounting fixation. With EasyFix+, fitting is fast, fuss-free and secure.

RIMLS®+

ENGINEERED FOR HYGIENE.

With every flush, RimLS+® delivers a powerful whole bowl clean with no place for bacteria to hide.

Splash-free and easier to clean, RimLS+ is the go-to solution for busy bathrooms. 88% of households would buy an Ideal Standard Rimless+ toilet. A toilet with excellent hygiene performance.¹

PROSYS®

ENGINEERED FOR YOUR PEACE OF MIND.

The ProSys® installation system provides complete pre-wall solutions for all washroom fixtures: toilets, urinals and basins. With different products for solid and dry wall applications, ProSys® is ideal for a wide variety of projects. The versatile range combines seamlessly with Ideal Standard's range of ceramics and fittings to ensure optimal performance. With end-to-end quality control and exceeding testing standards, the ProSys® system provides complete peace of mind.

¹Result of a user survey commissioned by Ideal Standard and conducted by the institutes TCV-/isi-GmbH [n = 1.000 households with residential property – Germany n=500; Italy n=500], based on the outcome of external tests conducted by X-Tech srl for Ideal Standard measuring hygienic parameters of the toilet flush [unwashed toilet area, number of water splashes]. Scientific Supervision of User Survey: Prof. Dr. Andreas Scharf, University of Applied Sciences Nordhause.

CONCEALA 3 CISTERNS

Smarter flushing solutions
– quiet, efficient & made
for easy install.

A larger 2" water outlet means an optimal flush every time.

Plus, a 'silencer tube' on the inlet valve and a mesh filter ensures quieter filling.

All models feature delayed fill inlet valve, the cistern only refills after full flushing, saving water.

Versatile applications.
Simple installations.

Cisterns are easily rotated, allowing for left and right-hand inlet water supply. Alternatively, just rotating the components allows for bottom and top supplies.

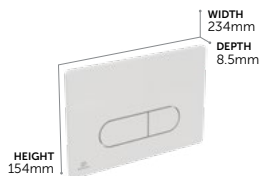

COMPLETE THE
INSTALLATION

GUARANTEE

Ideal Standard have been producing bathrooms for more than 100 years. Intensive and continuous testing is the key to class-leading durability. Designed to endure the impact of daily use, all of our products are guaranteed to perform stylishly and reliably, year after year.

Our confidence in the quality and reliability of Ideal Standard and Armitage Shanks products enables us to guarantee many of them for a lifetime. Our guarantee is offered on all products that have been used in the manner for which they were intended and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our fixing instructions and local water by-laws. In the unlikely event the product fails within the guarantee period, we offer a free replacement or replacement part (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installation.

For full conditions, please refer to our website:
www.idealstandard.co.uk/about-us/guarantee
