## Commercial Washroom

# Hygiene Redefined

Hygiene is part personal ritual and part life saving essential. For more than a century we have worked to understand and refine the practice of hygiene in the washroom setting. Today, more than ever our superior technology and research are focused on the delivery of intelligent, sustainable and durable solutions for the wellbeing of all.

The products in this document have been specifically and carefully selected to meet the needs of the washrooms in all settings including hotels, offices and public washrooms.

SMART SOAP INTEGRATED SENSOR TAP - RIM MOUNTED

Rising to the challenges of the modern world calls for a new definition of hygiene. That's why we created Intellimix® – a smart touchless tap that dispenses both water and soap. It encourages users to always wash with soap, which the World Health Organisation recommends as the most important measure we can take to avoid getting sick and spreading infections. Intellimix® doesn't just deliver superior hygiene, though – it also reduces running costs, improves sustainability, and even makes maintenance simple. Black models are produced using Physical Vapor Deposition (PVD). A thin protective coating is applied in a vacuum, which not only preserves the vibrancy of the colour, but also makes the finish ten times more resistant to chemicals, wear, impact, discoloration and corrosion.

FEATURES

- Improved hygiene
- Lasting savings
- Next-gen sustainability
- Designed for better
- 2 finish options
- Certificate of Conformity available on application

## Edit L

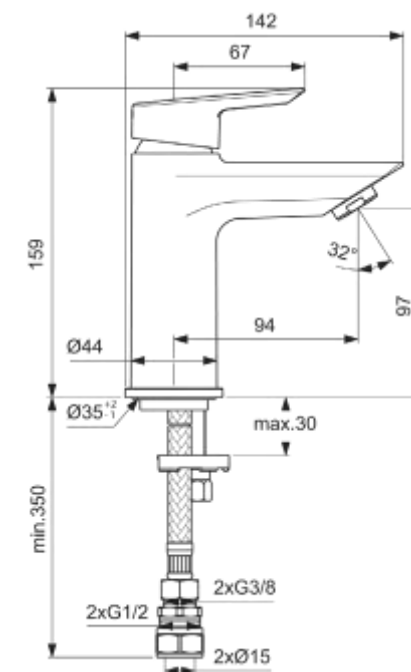

BC709AA Basin mixer no waste

### SINGLE LEVER BASIN MIXER

Edit L taps have clean geometric lines combining round and angular shapes. Designed to complement Edit L ceramics, they also match numerous other suites.

#### FEATURES

- 28mm ceramic disc cartridge
- 5 lpm flow regulator fitted
- Easyfix
- Flexible tails
- Max temperature limiter

## Edit L

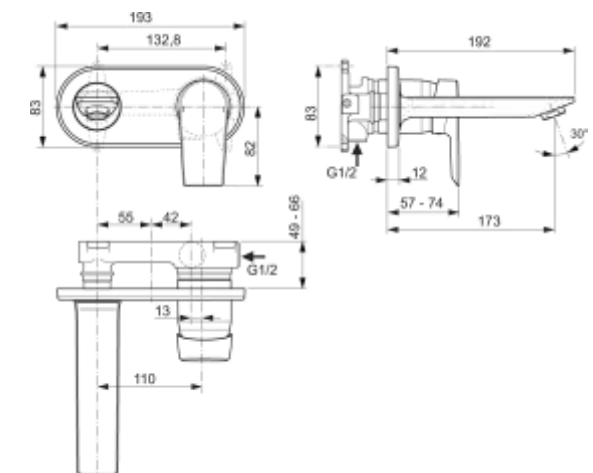

A1350AA Basin Mixer  
A5948NU Built-in kit

### SINGLE LEVER WALL MOUNTED BASIN MIXER

Edit L taps have clean geometric lines combining round and angular shapes. Designed to complement Edit L ceramics, they also match numerous other suites.

#### FEATURES

- 47mm ceramic disc cartridge
- 5 lpm flow regulator fitted
- Oval faceplate
- Requires built-in kit A5948NU
- Max temperature limiter
- Without waste

## Edit R

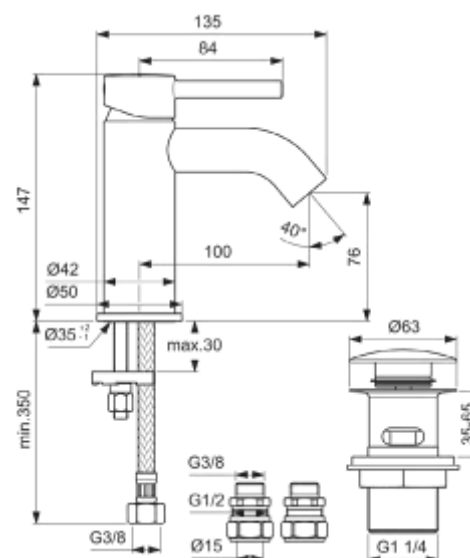

BC710AA Basin mixer no waste

### SINGLE LEVER BASIN MIXER

With its iconic cylindrical body shape, Edit R complements a wide range of ceramic ware. Edit R is a great choice for use in washrooms is suitable for use with both high and low pressure water supplies.

#### FEATURES

- Ceramic cartridge
- Suitable for both high and low pressure installations
- Equipped with 5lpm eco flow regulator to save water and energy
- Easyfix system on basin mixers - allows faster, hassle free installation
- European manufacture
- Flexible tails to simplify installation with 15mm compression connections
- 5 year guarantee

Sensorflow E

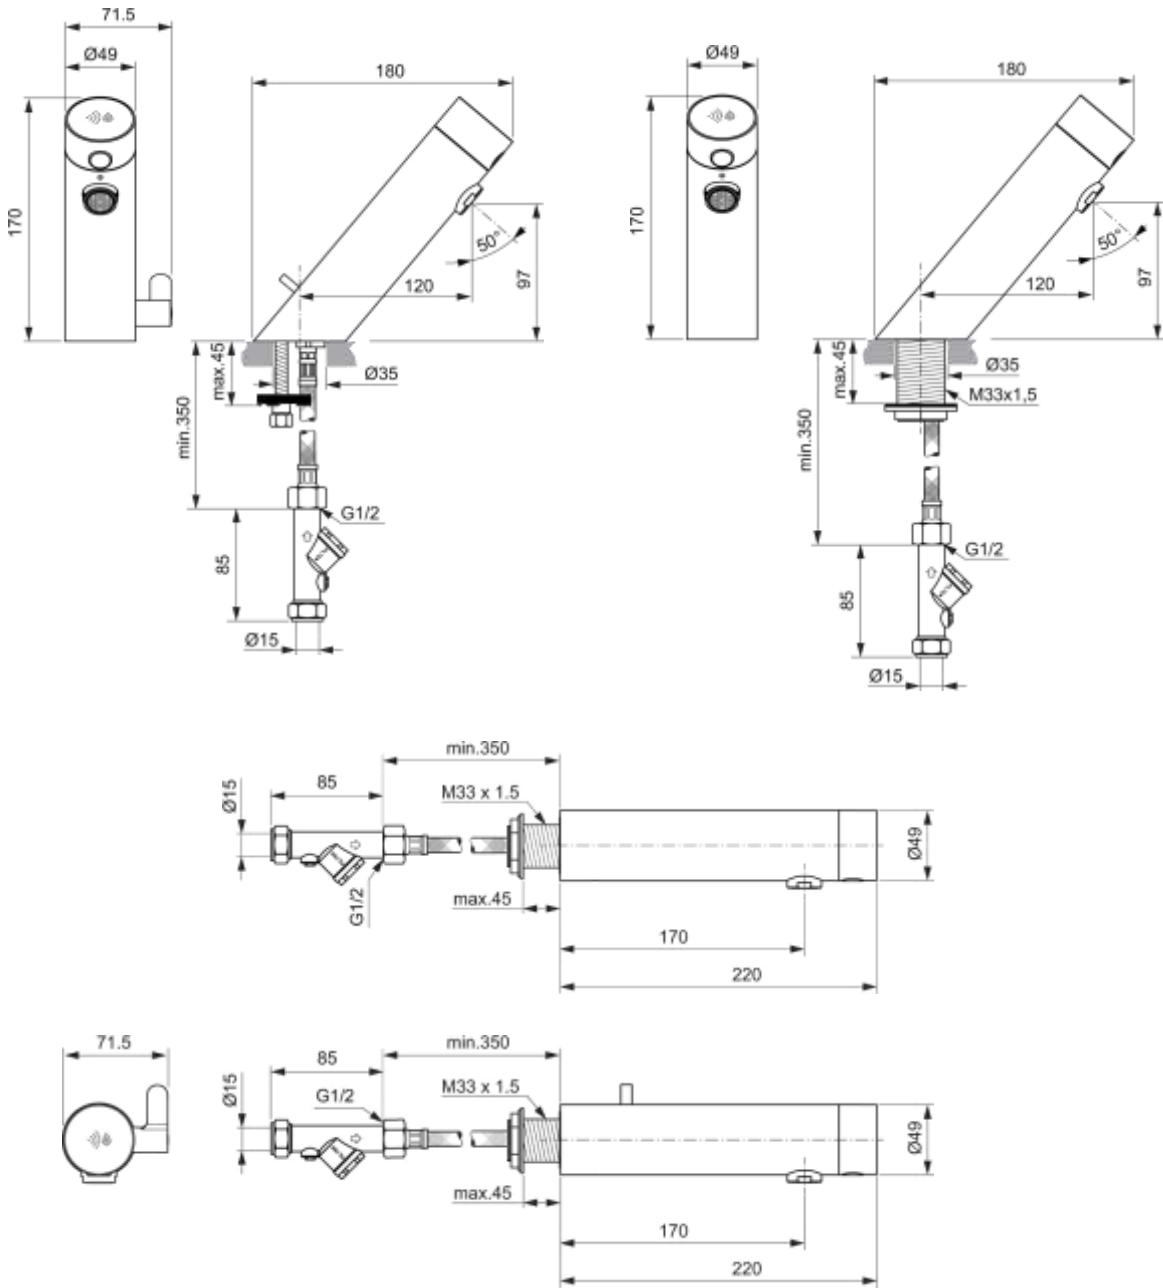

BLACK ONYX DECK AND PANEL MOUNTED MIXER

Sensorflow E in Black Onyx offers hygiene, style and easy and cost effective maintenance. Designed for the quick replacement of existing commercial mixers, the availability of mains or battery powered models means it's ideal for installation in washrooms with or without pre-existing power supplies. Black Onyx models are produced using Physical Vapor Deposition (PVD). A thin protective coating is applied in a vacuum, which not only preserves the vibrancy of the colour, but also makes the finish ten times more resistant to chemicals, wear, impact, discoloration and corrosion.

FEATURES

- Designed for quick replacement of existing taps
- Pre-assembled components cut installation time
- Long-life lithium battery operated models deliver performance reliably for up to 5 years
- Integrated battery and solenoid valve can be accessed through the front or top of the tap for hassle-free maintenance
- Infrared sensor positioned close to the spout for more accurate detection of hands
- 3.8L per minute flow regulator helps saves water
- Easy to clean smooth solid brass body
- Narrower waterways to reduce bacteria build up
- Supplied with 42°C (fitted) and 60°C (supplied) temperature limit stops on temperature control models
- Water flow safety stop after 55 seconds
- Certificate of Conformity available on application

## Contour 21+

### CERAMIC & BRASSWARE PACK (EXCLUDING RAILS AND SEATS)

Doc M close coupled WC and basin pack in left or right hand versions. Left hand illustrated.

Specifically designed to latest recommendations which call for the tap to be positioned more conveniently on the side of the basin closest to the seated user. These packs have a left hand or right hand single taphole basin specific to that need. Taps have copper tails as these are preferred in many applications. TMV3 approved basin mixer to help prevent scalding with integral thermostat to reduce Legionella risk. Water saving delay fill 4.5 litre cistern.

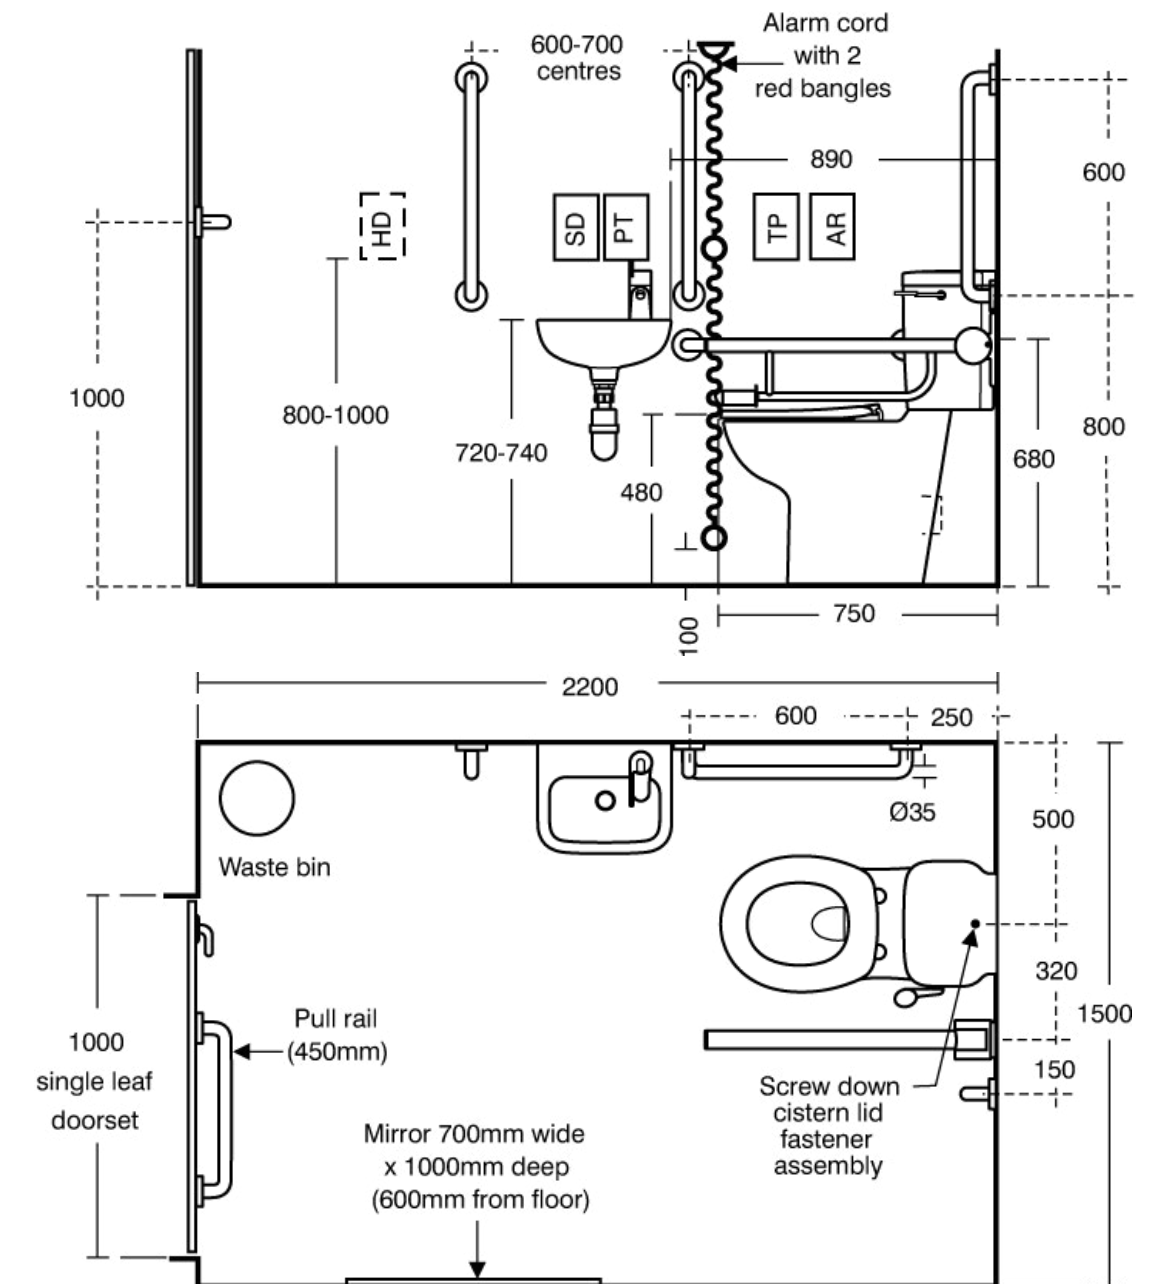

Shown in image and illustrated:

# 8 Certification & compliance documentation

## Compliance documents for WC suites and urinals

In order to meet DEFRA compliance requirements for WC suites in relation to Reg 4(1)(a) of the Water Supply (water fittings) Regulations 1999 it is necessary for a manufacturer to supply a declaration matrix confirming which flushing cisterns have been tested with which WC bowls.

Together with the Declaration of Performance and Declaration of Compliance for Backflow Prevention, this document provides all the information and evidence of compliance a water company should require.

[Access matrices showing tested combinations segmented by close coupled ceramic WC suites, Conceala and ProSys products.](#)

[Access Declarations of Performance meeting the Construction Products Regulation \(CPR\)](#)

[Access Declarations of Conformity/Compliance \(DoC\) confirming that WC suites incorporate an AUK1 backflow arrangement as defined in the Water Supply \(water fittings\) Regulations 1999](#)
