Special Notes

*Anti-slip is a resistant finish that reduces the chances of slipping, it does not prevent all slipping. Not suitable in areas involving the use of special chemicals. Framework is required at installation to support the rim and secure the panel. Panels require trimming to size at installation. Consideration should be given to safe hot water delivery and the use of an appropriate temperature reduction device, see A5901AA or Part G for guidance. Supported on a steel cradle with adjustable feet.
